

Hydrostatic Pressure Tester(1 to 10 Lines)

- Determination of internal pressure resistance of pipes and fittings at different time intervals by performing hydrostatic pressure and burst test
- Connection via network port (LAN) and wireless connection (Wi-Fi) to the computer, with advanced software to control and perform tests as well as plotting pressure, time and temperature
- Equipped with a 7 inch color touch screen for easy settings
- Equipped with a logger to store test results without the need for a continuous connection to the computer for up to 10,000 hours
- Ability to determine the rate of pressure increase and pressure control in the range of 2% and -1% of the set pressure
- Equipped with electric motor pump, pressure sensor and high quality solenoid valves
