

## Automatic Hot Press Machine

- Preparation of polymer sheets, sheets and films
- Automatic hydraulic pressure application system, with the ability to temperature -force programming and pressing time -hot pressing time and bubbling
- Equipped with a 4.3 inch color touch screen for easy settings
- Uniform distribution of elements throughout the heating plate with PID control system up to 300 °C with a resolution of 0.1 °C
- Equipped with plate cooling (Coling) with relevant solenoid valve with adjustable cooling time
- Equipped with hot plate cooling (Cooling) with relevant solenoid valves depending on the needs of the operator and the ability to adjust the cooling time
- Equipped with Teflon coated metal molds to prevent samples from sticking to the mold in different thicknesses and dimensions
